J. Douglas Cambell, Director  
PolyOne Corporation  
33587 Walker Road  
Avon Lake, Ohio 44012

Dear J. Douglas Cambell:

On behalf of all of the Citizens of the Borough of Wharton, I am writing to express our gratitude for the responsible and pro-active manner in which PolyOne has addressed the LE Carpenter Super Fund Site that is located within our Municipality. As you are aware, representatives from PolyOne came to the Borough just about 2 years ago with an aggressive plan to accelerate the remediation of this site. We have eagerly supported and advanced those plans with the Environmental Protection Agency and the Department of Environmental Protection and were glad to see those plans obtain final approval this past December. Cleanup is actively underway today and we look forward to its completion later this spring.

We were also quite pleased when the PolyOne representatives advised us of the Company's desire & intention to turn the property over to the Municipality for our use on completion of the cleanup. We are completely satisfied with the stipulations of the "Letter of Intent" that were put forth last spring and agreed upon in concept by our respective attorneys in July. We will maintain ownership of the site as a Municipal property and ensure permanent enforcement of any and all restrictions related to the remediation plan. Both the Municipality and Poly-One have received significant favorable press and Federal attention as a result of our collaboration.

In anticipation of the eventual cleanup and transfer of the property, we have already invested significant sums of money in planning, engineering and a redevelopment classification for this and surrounding properties. We also have hundreds of thousands of dollars tied up in a much-needed access road through this property. If we do not proceed forward with the project this spring, we are at considerable risk of losing almost a million dollars in outside funding. We are a small municipality, with just a five million dollar annual budget, and would not be able to make up for that loss.

We cannot express enough how responsible and conscientious a Corporate Citizen Poly-one has been over the past two years to the Borough of Wharton. We have been given no reason to believe that Poly-One has changed their intentions. The current occupants of the building have been recently informed that they will get a six month lease extension from the date of transfer of the property, and as late as October of 2004, RMT, the on-site remediation company, was seeking plans from the Borough on our intended use once the cleanup has been completed. For us to move forward, we require only that the agreed upon "Letter of Intent" be signed by both parties. We hope we can count on your assistance and attention to help this action come about in the very near future.

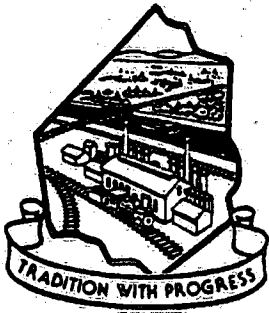

On behalf of the Citizens of Wharton, I would like to thank PolyOne for all their help.

Respectfully,

Mayor William J. Chegwidden
